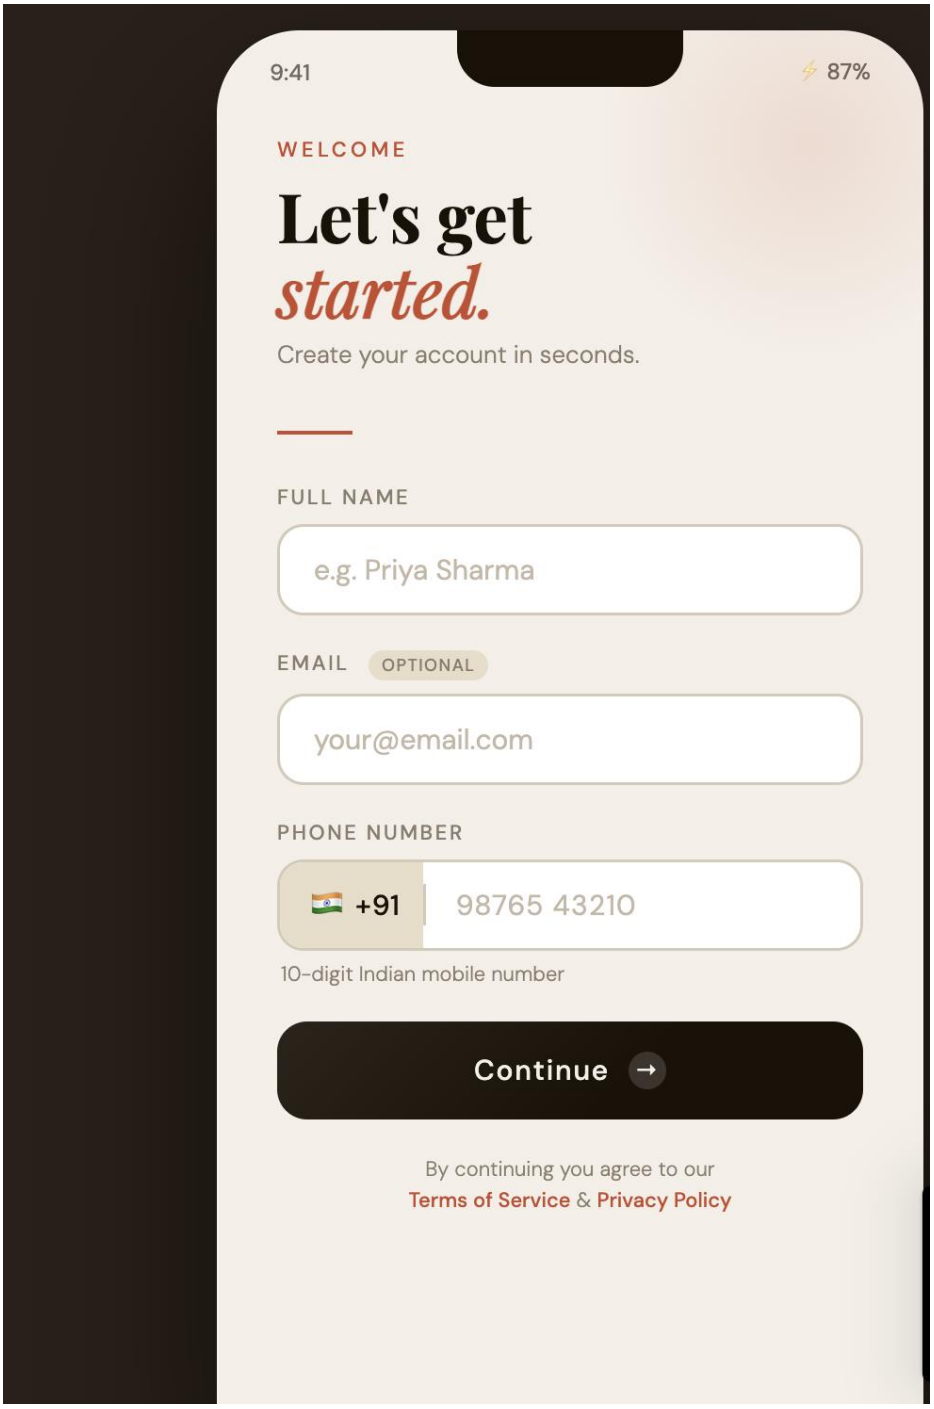
First page:

Splash Screen

Need transition with app name and logo.

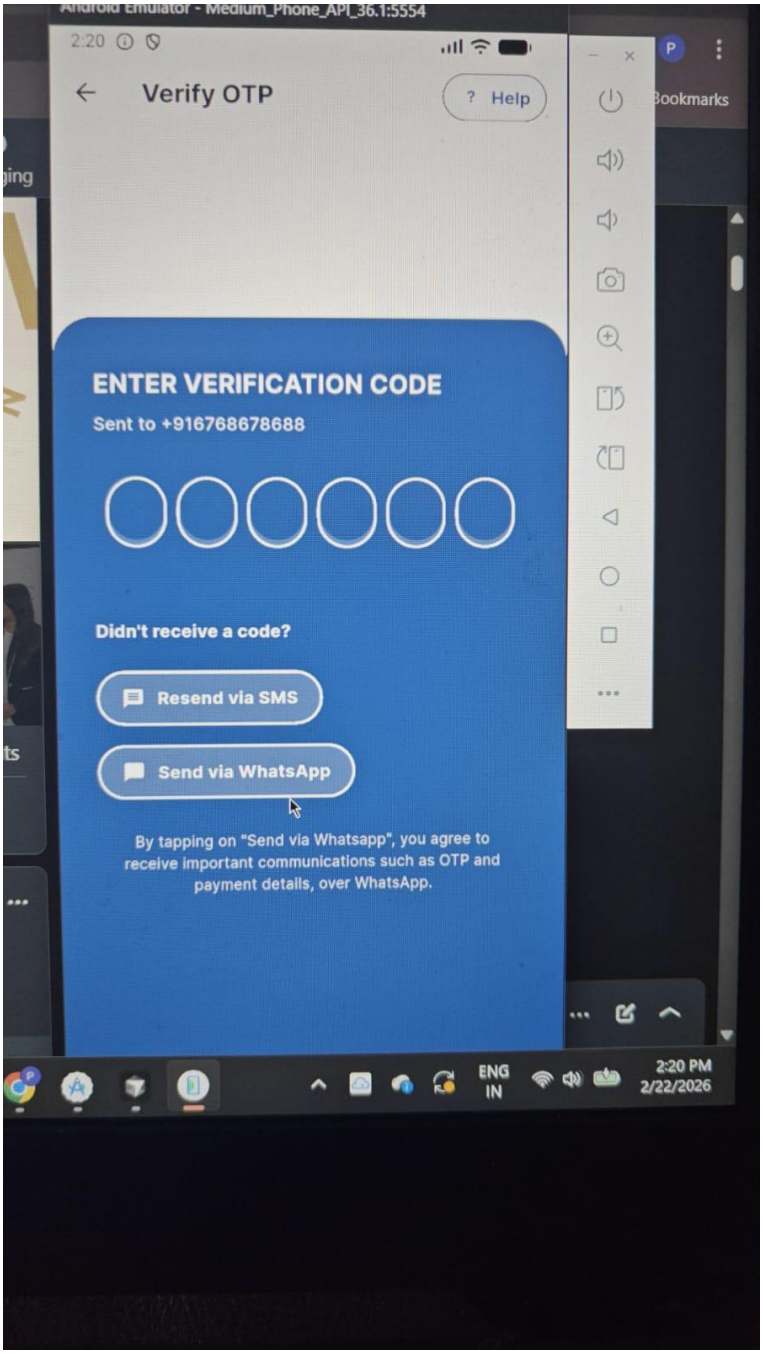
Second Page:



These are the features we need. need to re direct if I click terms and condition. Privacy policy

in phone number +91 is default and only allow 10 digit and check valid phone number.

Page 3 :

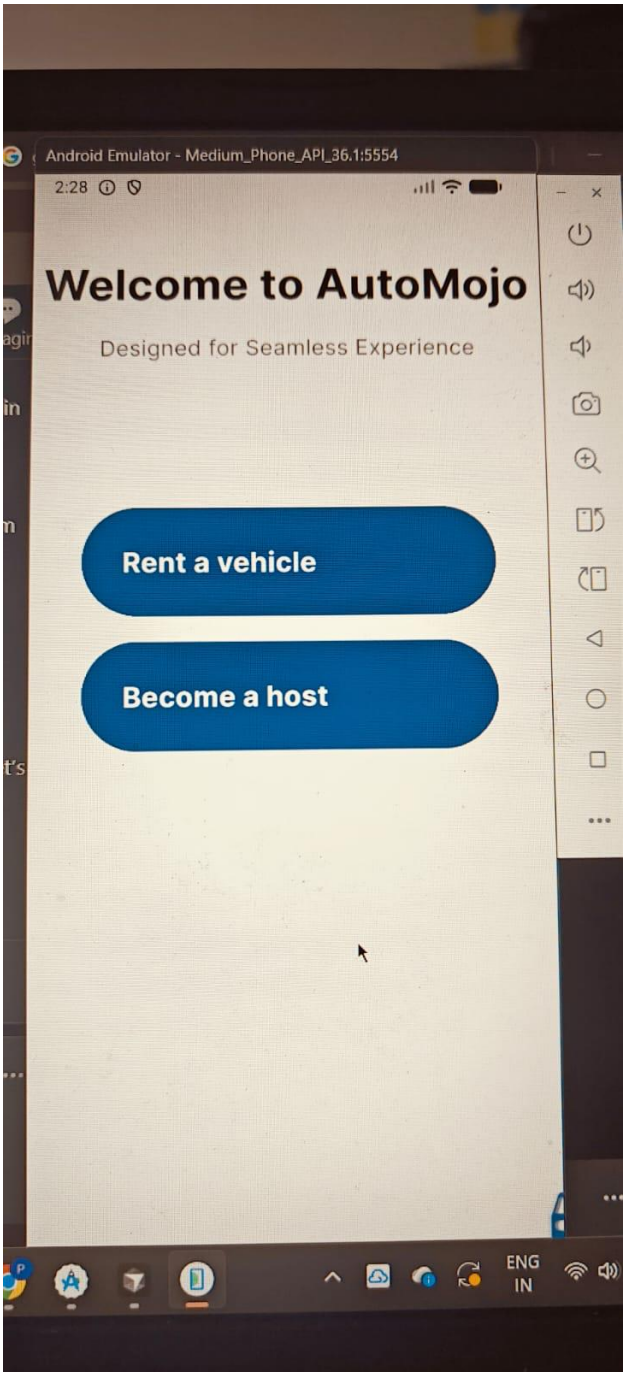


Need redirect for help to faq

Add timer for 30 for resend code.

No continue button. If you enter your code, it should automatically goes to the next screen

Page 4:



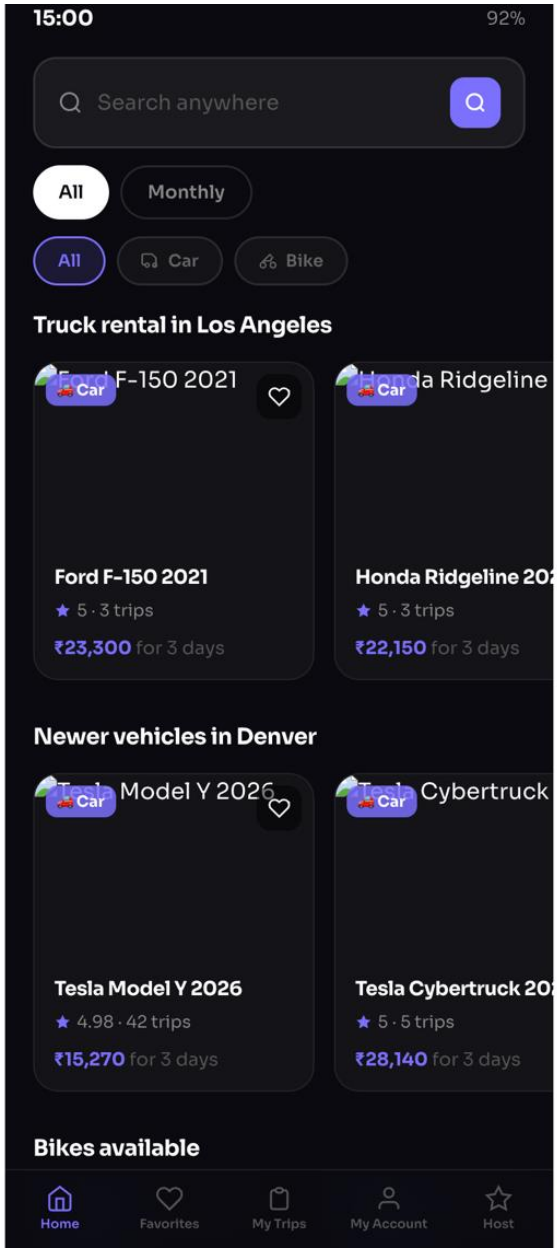
Rent a vehicle and become host should redirect to two different page.

faq on top right

bellow welcome hello #name

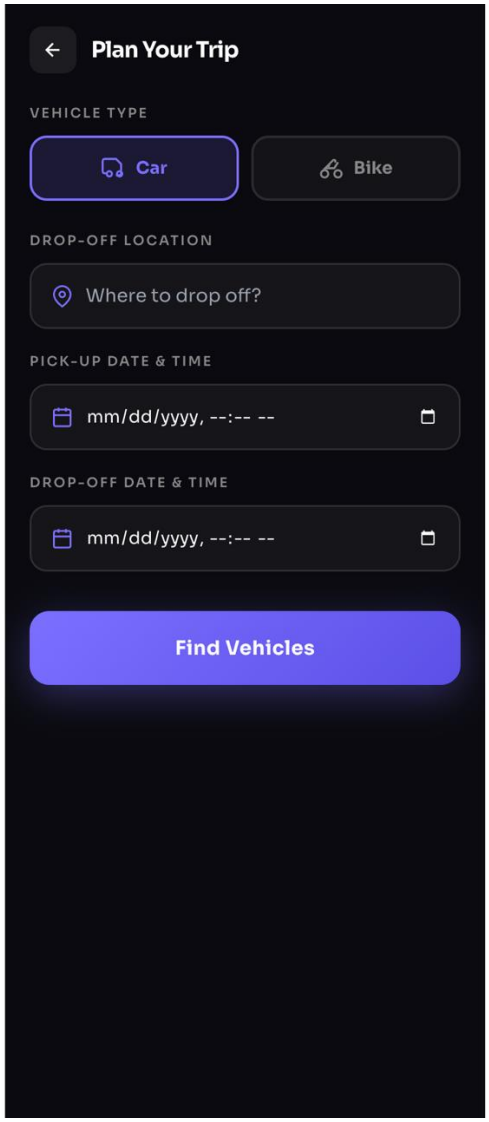
Page 5:

Rent a vehicle button action:



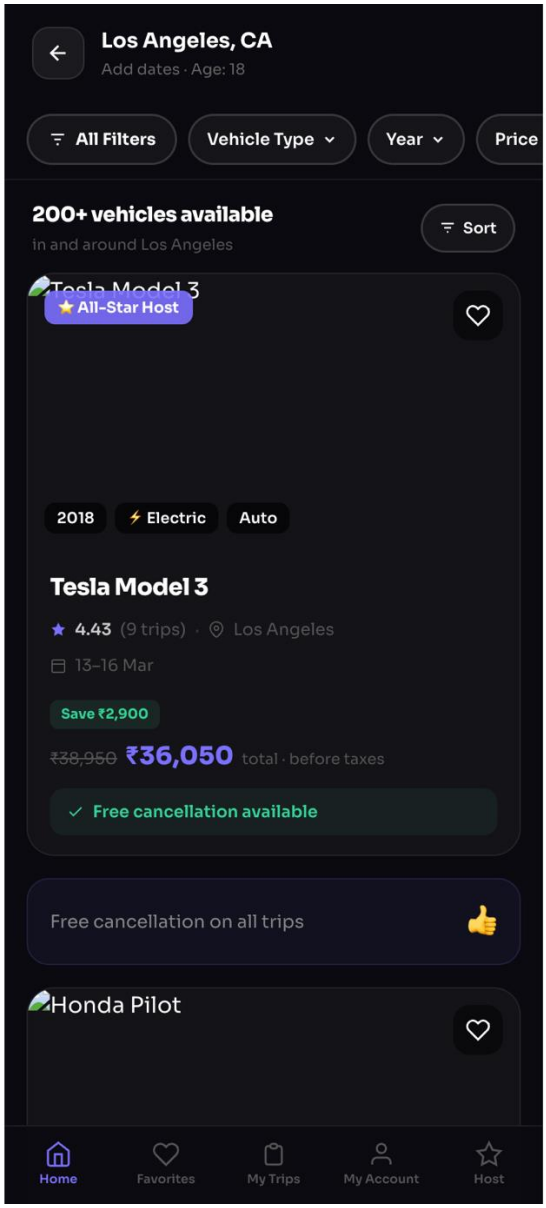
Page 6:

Search Bar action:



Page 7:

If I choose cars in previous screen this is the UI

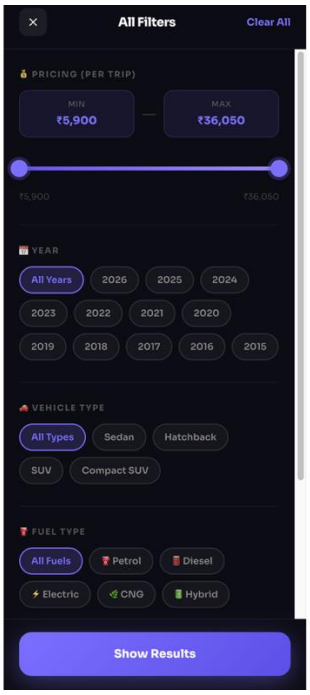


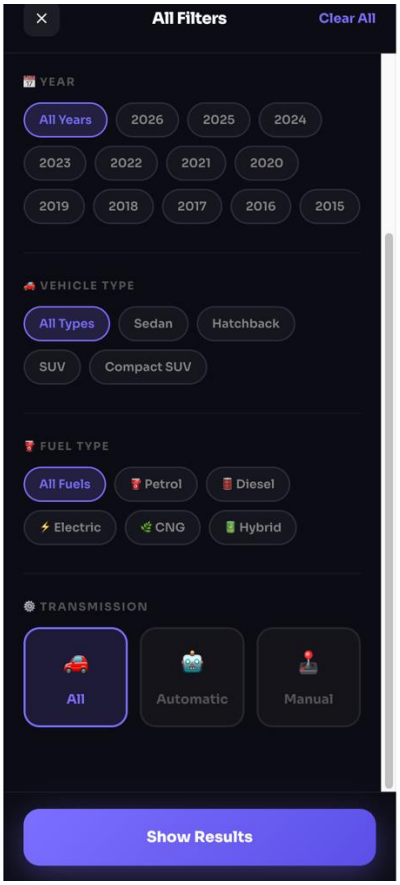
This is only for screen after search. Car image and ui is different.

for filter like vehicle type , price in this page use it from all filter page.

Page 8:

All filter images.

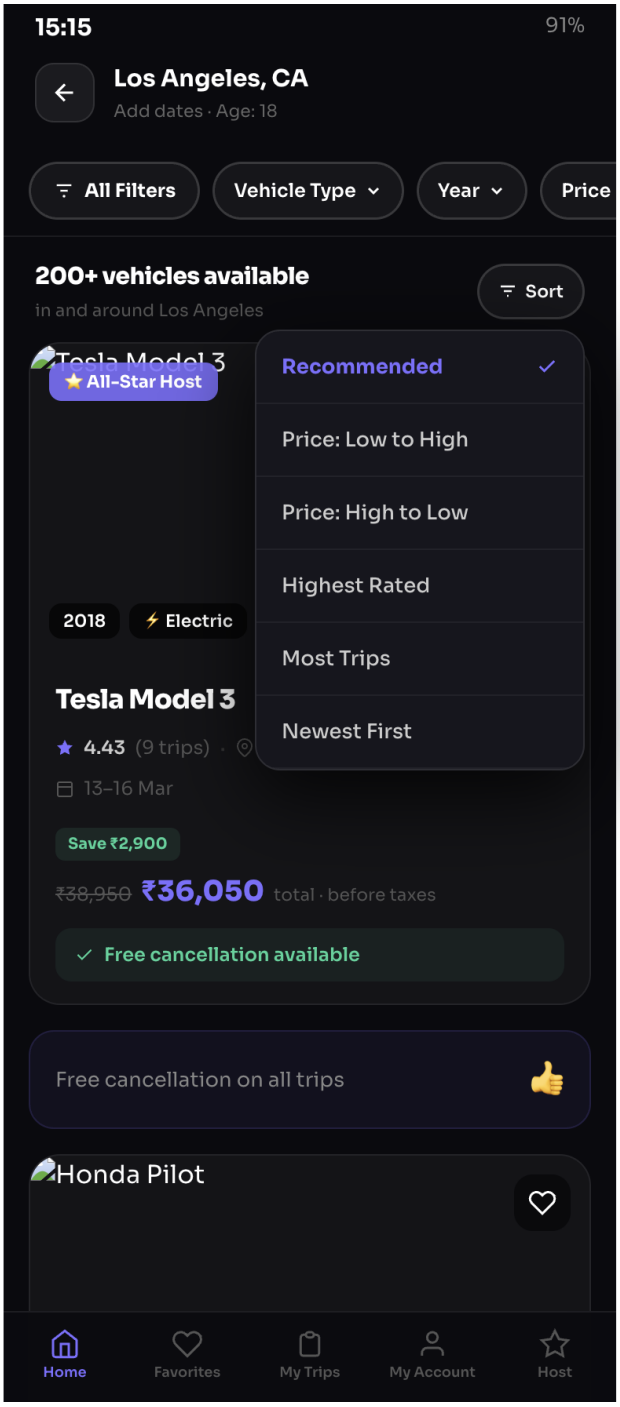




These are filters. Use this for main page filter drop down as well.

Page 9:

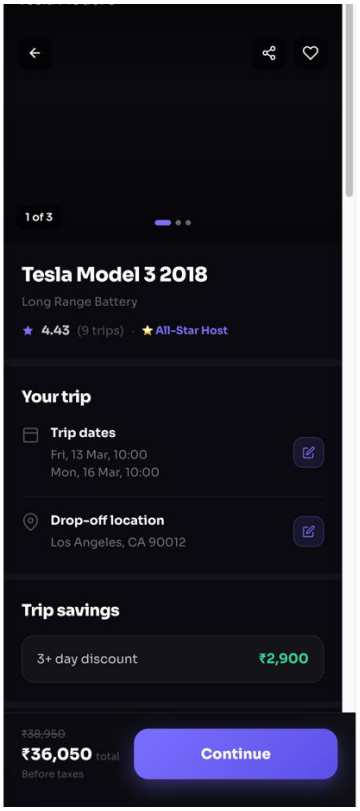
For sort by:

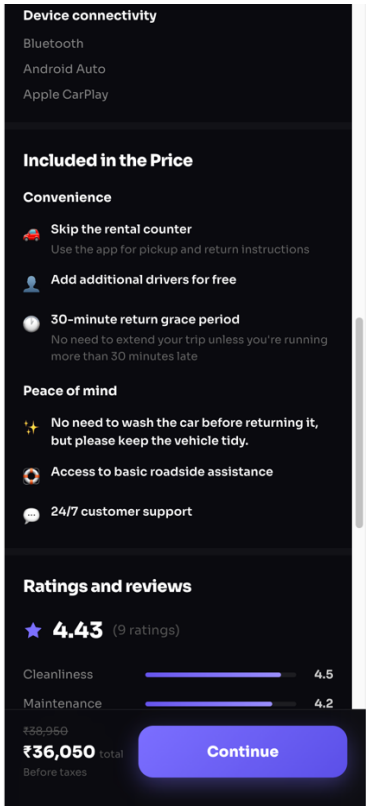


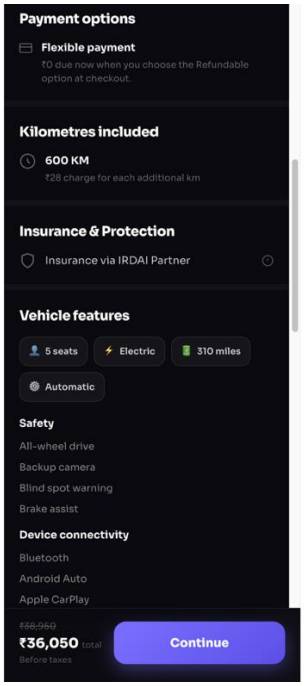
This is for sort by button action.

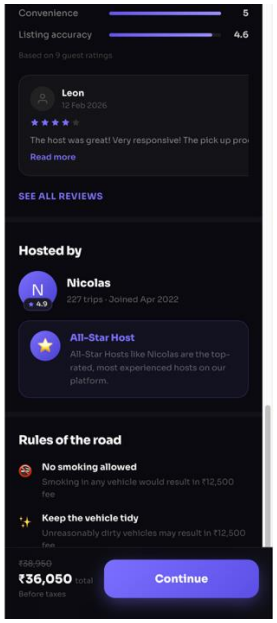
Page 10:

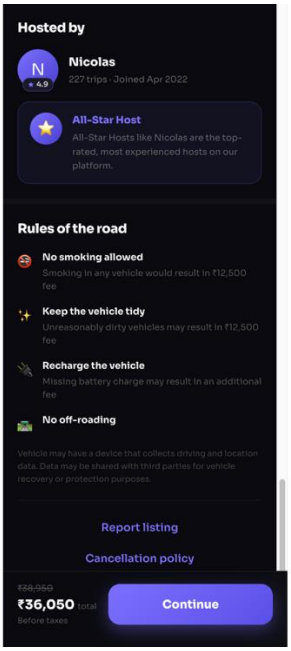
I click the car details, The result page





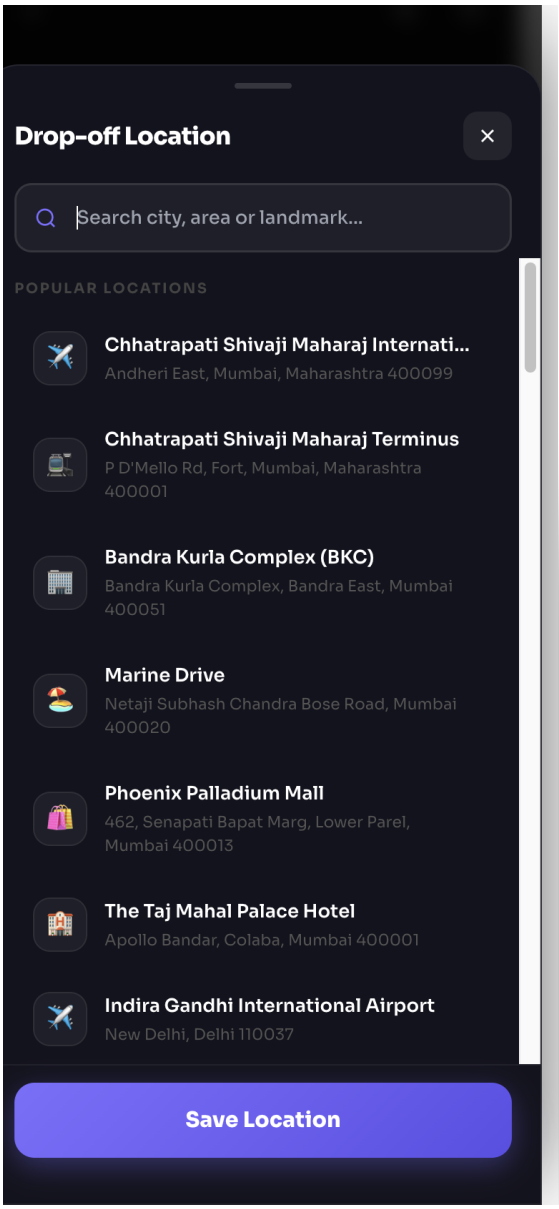


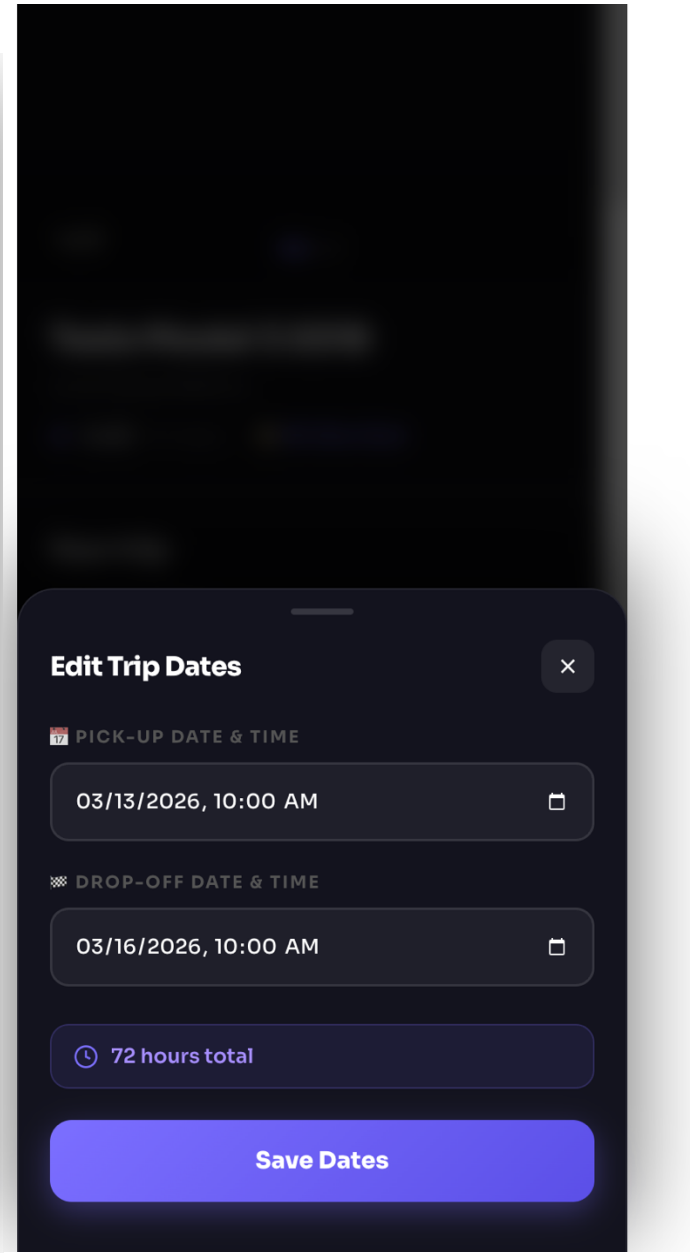




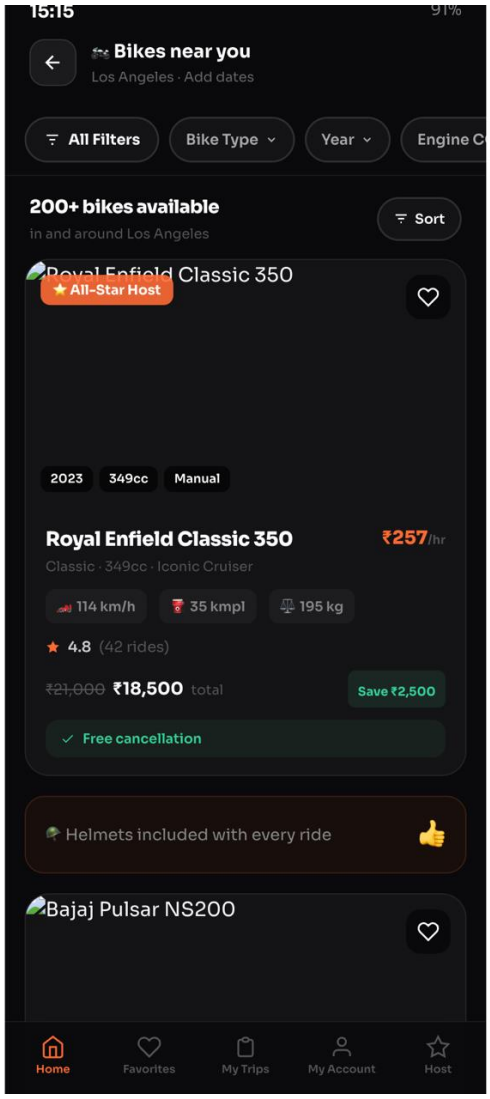
Page 11:

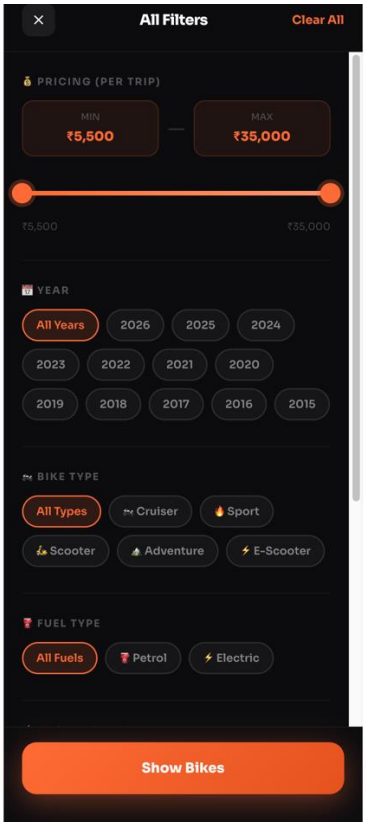
date and location change button action in previous screen





Page 12: Is I choose bikes in page 6, action is





1 of 2
